To: The Commission

**SUPPLEMENTAL REPORT ON  
ENHANCED 911 PHASE II IMPLEMENTATION**

SLO Cellular, Inc. ("SLO"), the Block A cellular carrier in California RSA No. 5 (San Luis Obispo), hereby files this Supplemental Report on Enhanced 911 Phase II Implementation in response to a letter dated December 20, 2000 from Thomas J. Sugrue, Chief of the Wireless Communications Bureau to Stephen Kaffee, Esq., SLO's counsel. SLO supplements paragraph No. 1 in its initial submission with the following information.

SLO intends to deploy a network technology solution to achieve ALI compliance. Accordingly, neither of the requests in Mr. Sugrue's letter for information regarding handsets is relevant to SLO's plans for deployment of E911 capability.

Because SLO is in the process of transitioning to its own switch and has not completed investigation of all aspects of a network solution, it is possible that SLO may change its selection. If SLO does change its selection, it will file another Supplemental Report with the Commission within 30 days of the change.

Respectfully submitted,

SLO CELLULAR, INC.
